

Waste management

The hotel is committed to managing waste in a safe and environmentally friendly manner by sorting waste within the hotel into general plastic and paper waste contracting specialized companies to collect and safely dispose of waste not disposing of used oils into the sewage system as they are collected and handed over to a specialized company for safe disposal and monitoring temporary waste storage areas to ensure cleanliness and safety.

Paper Reduction

The hotel aims to reduce paper consumption by relying on email and mobile messages instead of printing minimizing document printing and using electronic copies whenever possible.

Plastic Reduction

As part of the plastic reduction plan the hotel reduces the use of plastic cups and replaces them with acrylic or glass cups and uses reusable containers instead of single-use plastic ones

hazardous waste

A separate storage area has been designated for the collection and storage of hazardous waste, ensuring that it is segregated from other types of waste and handled and disposed of safely and properly. Examples of hazardous waste include empty chemical containers, damaged lamps, and used batteries.

Reducing Food Waste

The hotel works to reduce food waste through careful planning of purchases according to actual needs monitoring expiry dates regularly and placing guidance signs for guests and staff encouraging them to reduce waste and not take excessive portions of food.
